

AI Telephone Appointment Assistant

Overview

A conversational AI telephone appointment assistant built using Sarvam AI.

Features

- Greets callers through voice
- Collects the caller's name
- Collects the preferred appointment date
- Checks appointment availability
- Allows the caller to select an appointment
- Confirms the appointment

Conversation Flow

Start → Ask Caller Name → Ask Preferred Date → Check Availability → Select Appointment →
Confirm Appointment

Technology

- Sarvam AI
- Conversational AI
- Telephony / Voice Agent

Purpose

This project demonstrates how a voice-based AI agent can automate appointment-booking conversations over the telephone.

Note

Never upload API keys or other secret credentials to GitHub.
